

## Crypto Cloud Punk 'CCP' 2022 White Paper

### Metaverse

Only holders have the ability to customize the Crypto Cloud Punks M.V. However Crypto Cloud Punks M.V. is free for the public to visit without the ability to customize anything. Public visitors may help with interaction if there are Events, Auctions, or Virtual Stores from big brands so the traffic will help to push and market the collection and will try to get hold of Crypto cloud Punks NFTs.

### P2E - Virtual Career

Your game assets scripts are extensions to your game plan. You can automate all of your assets to achieve one goal. For example, if you want to surround a target you can do so by automating those assets in-game with AI and save time for other tasks. Just keep in mind that this function will then become available for all the players to use, modify, or copy. Other functions include management of in-game store fronts that will bring special attention from big name brands to us within the Crypto Cloud Punks M.V. These management functions will sell all kinds of products from groceries to airline tickets so you can hold an interactive job during those kinds of events.

### Market Front

If you own a real life product and you want us to put it in Crypto Cloud Punks M.V. we can provide that service so all of your products, sizes, colors, and categories are available for a complete virtual experience. Note that this subject applies to our community standards.

### Shared Royalties:

The Royalties of this project is set to 10%. Every 2 months the Royalties gained from the secondary sales will be split equally for 100 holders that win the Shared Royalties Split Raffle.

The Shared Royalties Split Raffle or SRSR is randomly held within these 2 months to prepare the list of 100 random holders for the Shared Royalty Split. The list of the winners from the Shared Royalties Split Raffle is revealed every two months

## Crypto Cloud Punk 'CCP' 2022 White Paper
